

## INDICATOR DATA SHEET

### Indicator: Threatened species

#### Definition:

This indicator measures the number of threatened species in proportion to the total number of native species.

**Other Definition:** Threatened species are those at risk of extinction, and include endangered, vulnerable, rare, and determinate species as defined by the International Union for the Conservation of Nature.

The species concerned are native and not introduced.

**Category:** Environment

**Theme:** Biodiversity

**Type:** State

**Unit:** %

Data Needed	Source
Threatened species	Ministry of Agriculture
	Ministry of Environment
	National Centre for Scientific Research

Year	Mammals	Birds	Reptiles	Amphibians	Fishes	Molluscs	Other Inverts	Plants
2008 number	10	6	6	0	15	0	3	0

**Source of data/year:** Red List 2008, IUCN

**Geographic coverage:** National

**LEDO Reference:** 76

**Developed by:** LEDO

**Date:** November 2008
