

INDICATOR DATA SHEET

Indicator: Protected Coastal Area

Definition:

This indicator is set for a given year by the total area of protected zones, which are coastal as a whole or in part, that is to say that they contain within their bounds coastal ecosystems (continental and/or marine). It is the total area of the protected area that is taken into account even though the coastal portion often only makes up a small overall proportion.

Category: Environment

Theme: Biodiversity

Type: Response

Unit: Hectares

Calculation Method

Area of Palm Islands + Area of Tyre Coast Nature Reserve = Total Protected Coastal Area

Data Needed	Source
Palm Islands Area	Ministry of Environment
Tyre Coast Nature Reserve area	

Comments:

The area given includes both land and water around it.

Protected Coastal Area	Area (Hectares)
Palm Islands	420
Tyre Coast Nature Reserve	380
Total	800

Source of data/year: Ministry of Environment

Geographic coverage: National

LEDO Reference: 75

Developed by: LEDO
