

INDICATOR DATA SHEET

Indicator: Share of collected and treated/untreated wastewater by the public sewerage system

Definition:

This is the proportion of wastewater produced and collected from a collective network (from households, local authorities or industry) that has been adequately treated to allow its discharge into the environment without impacting human health or ecosystems, or which has been left untreated.

Category: Environment

Theme: Water

Type: Response

Unit: Percentage

Calculation Method

Amount of Treated Wastewater/ Amount of Collected Wastewater x100

Amount of Untreated Wastewater/ Amount of Collected Wastewater x100

Data Needed	Source
Amount of treated wastewater	Water Authorities, Municipalities
Amount of untreated wastewater	Ministry of Environment
Total amount of collected wastewater	Ministry of Energy & Water CDR

Comments:

There is only one wastewater pretreatment plant in Ghadir, near the airport area. The amount of wastewater pretreated by this station is negligible

Year	Value of the Indicator
2000	100% not treated

Source of data/year: Council for Development and Reconstruction, 2000.

Geographic coverage: National
